E-Resources available in the Library of PGIM

The E-resources available in a library, PGIM play prominent role in facilitating access to the required information to the user in an expedient manner. Further one need not go to the library to make use of print formats as the digital resources can be made use of by any user through Online access via networks or authentication methods at any time comfortably.

ClinicalKey®

ClinicalKey is a clinical search engine from Elsevier featuring books, medical journals, images, videos, First Consult content and much more. ClinicalKey streamlines access to consistent, evidence-based information to help clinicians do just that. From quick answers at the point of care to leading full-text reference material, it delivers trusted content to support clinicians and those in training who need to:

Stay abreast of rapidly expanding clinical knowledge,
Quickly confirm diagnosis and treatment information and
Advance critical thinking skills and research

Wolters Kluwer

UpToDate®

UpToDate, Inc. is a company in the Wolters Kluwer Health division of Wolters Kluwer whose main product is UpToDate, a software system that is a point-of-care medical resource. The UpToDate system is an evidence-based clinical resource. It includes a collection of medical and patient information, access to Lexi-comp drug monographs and drug-to-drug interactions, and a number of medical calculators.

According to UpToDate, it “is designed to get physicians the concise, practical answers they need when they need them most—at the point of care.” Topic reviews are written by physician experts who review the literature then synthesize the information into specific recommendations for diagnosis, management, and therapy.

Taylor & Francis Online

Taylor & Francis, a division of Informa, is a specialist in scholarly research and in helping academic and research communities make new breakthroughs. Their subjects covered Medicine, Dentistry, Nursing & Allied Health and other subjects.

Hinari
Research for Health

HINARI (Health Internetwork Access to Research Initiative) Access to Research for Health Programme was set up by the World Health Organization and major publishers to enable developing countries to access collections of biomedical and health literature. There are up to 15,000 e-journals and up to 60,000 online books available to health institutions in more than 100 countries.

PubMed.gov

PubMed is a free search engine accessing primarily the MEDLINE database of references and abstracts on life sciences and biomedical topics. The United States National Library of Medicine (NLM) at the National Institutes of Health maintain the database as part of the Entrez system of information retrieval. The PubMed database contains more than 33 million citations and abstracts of biomedical literature. It does not include full text journal articles; however, links to the full text are often present when available from other sources, such as the publisher's website or PubMed Central (PMC).

emerald
PUBLISHING

Emerald is a global publisher providing high quality, peer-reviewed research with a portfolio of over 300 journals, more than 2,500 books and over 1,500 teaching cases. Emerald Publishing Limited is a scholarly publisher of academic journals and books in the fields of health care and other subjects.

OXFORD
UNIVERSITY PRESS

Oxford Medicine Online is a digital platform hosting Oxford University Press' prestigious medical titles. This resource brings together authoritative texts by world-renowned authors available online for the first time. With over 1,000 books available, many of which include exclusive digital tools such as videos to further enrich learning and practice, online medical content continues to grow.

Effective Searching Methods

A search method is a way of efficiently and effectively finding the information you need to answer your research question. General search techniques that can be used in most databases and search engines are briefly described below.

CONSTRUCT A SEARCH STRATEGY

- **Define** your topic
- What **question** do you want to answer?
- Identify **keywords** and **phrases** that describe your answer
- **Brainstorm** alternate spellings, related terms, broader concepts, and more specific concepts
- Identify the **subject area** or areas which your topic may fall under

SELECT A DATABASE

- Browse the A-Z List of Databases for your **subject area**
- Pick **1-3 databases** that look most relevant to your search

TEST AND REFINE YOUR SEARCH

- **Test your keywords** and phrases in each database
- If you don't find what you're looking for right away, try some of the **alternate terms** you brainstormed earlier
- **Refine** your search using the options

ADVANCED SEARCH TECHNIQUES

- Phrase searching looks for the exact words in the exact order
 - **"sports injury"** or **"mass incarceration"** or **"solar power"**
- Truncation (*) and wildcards (?) search for words that contain the entered text, while also looking for alternates
 - **rob*** searches for *robotics, robbery, and Robespierre.*
 - ***oxi*** matches terms such as *antioxidant, dioxide, and paradoxical.*
 - **wom?n** searches for *woman, women, and womyn.*
- **Combine** search boxes using AND, OR, NOT. AND searches for both terms, OR searches for either term, NOT omits a term. Combining these operators with truncated and wildcard search strategies can enrich the results.
 - ("solar power" **AND** nanocrystal) **NOT** chem*
 - Na **OR** sodium
 - (heart **OR** cardi*) **AND** treatment

Fees for the services provided by the Library, PGIM

Item	Fee from 01.01.2021 (Rs.)
Membership fees	
Annually	3500.00
Monthly	350.00
CD Burning	
With CD and case	170.00
With a CD	120.00
With a DVD	130.00
Without DVD/CD	90.00
Scanning (1 page)	65.00
Print outs	
Single p/p	7.00
Doublep/p	10.00
Photocopy	
Single	3.00
Double	5.00
Reproduction of Theses	2000.00 +Photocopy charges
